ETHERMA°
EFFICIENT. ELECTRIC. HEATING.

PRODUCT DATASHEET

Type: LAVALITE-GL-450-MR
Art. Nr.: 40911

0 912010 541077

Short description

Infrared heating panel thin, glass mirror, 90x63cm, 450W, 230V

Product Description

The extra thin LAVA LITE infrared heating panel is impressive with its efficiency. Despite the 6 mm thick safety glass, the infrared heating panel is only 33 mm deep, including the mounting rails, making it ideal for wall mounting - even where there is less space, such as in hallways or stairwells. The glass surface is a very good radiation emitter and ensures optimal heat radiation. Due to the frame-less design and extremely shallow depth, the infrared heating panel blends harmoniously with the room. The glass surface is available in pure white and mirror finish. Outputs: 240, 450, 700 and 900 W, mounting depth: 33 mm, surface temperature: approx. 95 °C, vertical and horizontal wall mounting possible, protection rating: IP X4, surfaces: 6 mm ESG safety glass, plug connection cable: 1 m, CE marking.

ETIM characteristics

Type of IR radiation	IR-C
Mounting method	Surface mounting
Mounting direction	Horizontal/vertical
Degree of protection (IP)	IP55
Colour	Other
With imprint	✖
With room temperature controller	✖
With mounting material	✔
With framework	✖
Material framework	Other
Colour framework	Other
Surface treatment	Other
Surface structure front-side panel	Mirror
With lighting cove	✖
Dimmable	✖
Light outlet	Direct

Power consumption	450	Watt
Supply voltage	230|230	Volt
Frequency supply voltage	50|50	Hertz
Max. surface temperature	95	Degrees celsius
Height	630	Millimetre
Width	900	Millimetre
Depth	33	Millimetre
RAL-number	0
