1. Applicable documents

All available documents for the product
→ <http://www.festo.com/sp>

→ Assembly instructions for the inscription label holder

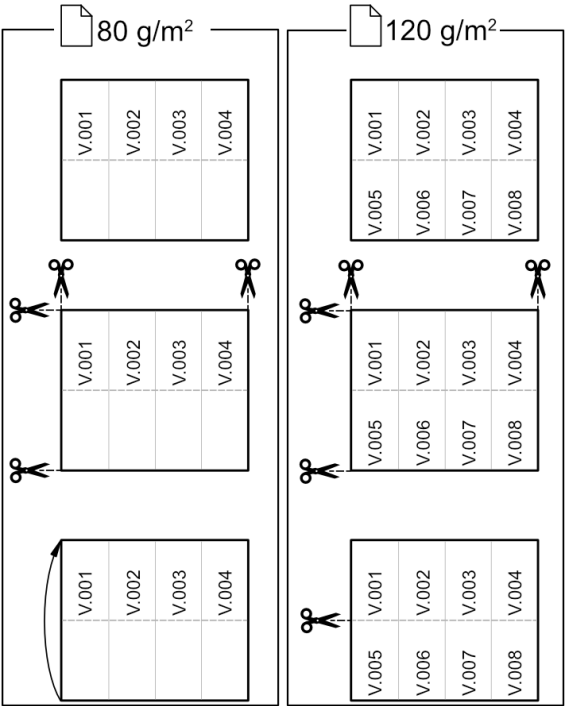

2. Safety

- Observe applicable documents.

3. Intended use

The labelling template is used for the identification of valves on valve terminals VTUX.

4. Creating valve labels

- Select the labelling template according to the inscription label type. The templates are designed for standard 80 g/m² paper and heavier 120 g/m² paper and are double the width of the inscription field on the inscription label holder.
- Input the valve identifiers in the selected template. Complete the top row only on standard 80 g/m² paper.
- Print the completed template with the "Original size" printer setting.
- Cut out the completed template at the outer frame.
 - Standard paper 80 g/m²: fold along the dotted line.
 - Heavier paper 120 g/m²: cut along the dotted line.
- Place the template in the labelling field on the inscription label holder.
