KitLock by Codelocks

KL1200

For more challenging locker environments, the KitLock by Codelocks KL1200 electronic locker lock[1] includes all the benefits of standard KitLocks but is tougher and more robust.

The KL1200 locker lock includes the standard KL1200 features; additional programming, stainless steel buttons, dual fixing points, increased battery life but now with improved updated features for 2024!

New Feature! Add up to 20 User Codes.
In Private Function it is now possible to support 20 individual users, each with their own code. This is ideal for multi-person applications such as shared equipment lockers.

New Feature! Auto-Open.
In Public Function the updated KL1200 locker lock can be programmed to automatically unlock at a specific time enabling the lockers to be cleaned for next day use.

New Feature! Dual Authorisation.
This new feature requires two valid User Codes to be entered for access to be granted. This adds an additional level of access control!

New Feature! Restricted Operation Time.
Control access between set hours. This feature is ideal for locker rental outside the normal office hours, and repeats every day automatically.

KitLock by Codelocks

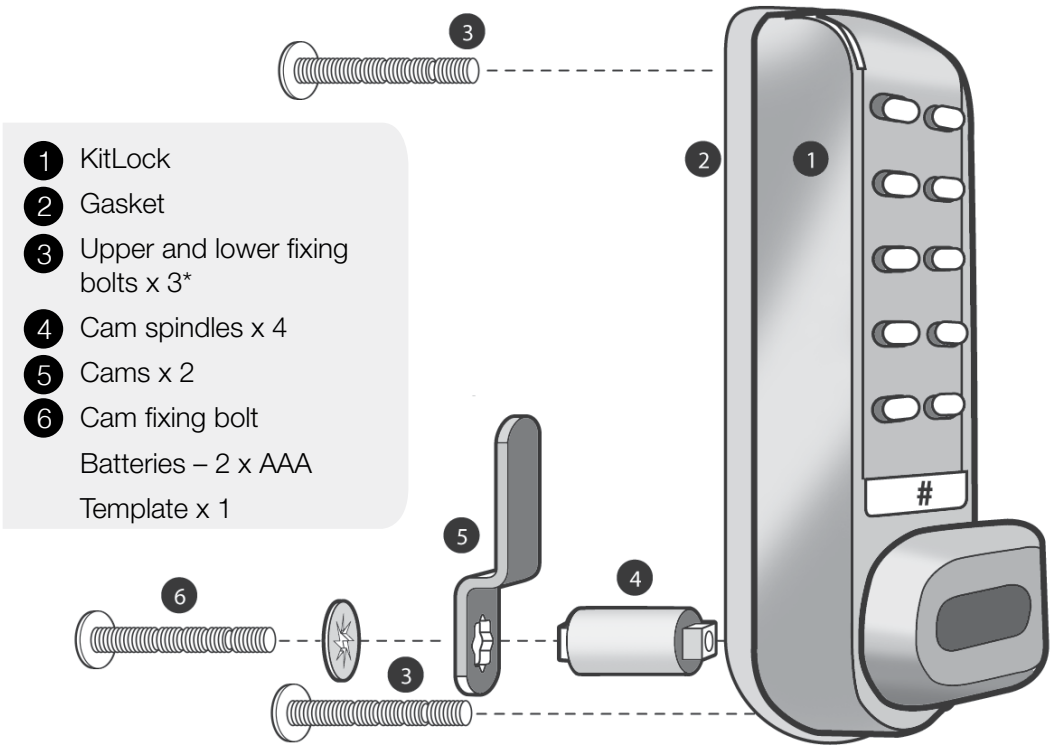

KL1200

FUNCTIONS

Two Modes of Operation
The KL1200 retains the standard Public and Private Functions.

Private Function
This is the default function and is already pre-programmed in new locks. This function is used where the same code will be repeatedly used, e.g. an employee with the same locker/drawer in the workplace.

Public Function
In this function the KitLock operates with a single User Code. The user enters a personal four digit code, this locks the lock. The same code is entered once only to open the lock before automatically being erased and ready for the next user. This function is used for short term, multiple occupancy applications, e.g. hot desking in an office or a locker in a sports club.

1. KitLock
2. Gasket
3. Upper and lower fixing bolts x 3*
4. Cam spindles x 4
5. Cams x 2
6. Cam fixing bolt

Batteries – 2 x AAA

Template x 1

*1 spare fixing bolt provided
