KL1000 NetCode®
Activate Generate Control

The KL1000 NetCode® provides the smart way to generate time-sensitive codes for a wide range of lockers and cabinets.

Through the online Codelocks Connect Portal or via the Codelocks simple API, you can create codes that have a specified start date, time and duration. Once the duration expires, the codes no longer work. Time-sensitive codes is a more convenient way to grant access as the code will not work outside a designated timeslot. Issue codes to visiting service engineers, delivery personnel (drop boxes), and medium-term locker rental. Generated codes can be sent by email or SMS.[4]

FEATURES

- Create codes for short, medium and long term
- Web based NetCode® generation
- Send generated codes via email or SMS[4]
- Three functions available
- Four types of NetCode®
- Up to 15,000 operations (2 x AAA batteries supplied)
- Battery override
- Red LED will flash on opening to indicate low battery
- Ready to fit doors up to 25mm (1")
- No WiFi connection required
- 11 button keypad
- Master, Sub-Master, User and Technician Codes
- All parts / fixings / templates included
- Non-volatile memory will be retained
- IP55 rated when fitted with gasket (available separately)

FUNCTIONS

Private Function
This function is used where the same code will be repeatedly used. Choose a single four digit User Code to use multiple times. Ideal for use where the lock is allocated to a single person for a long period of time.

Public Function
This function is used for short-term, multiple occupancy applications. Enter a four digit User Code to lock the locker, the same code is used to unlock. The lock remains open, ready for a new user and a new code.

NetCode®
This function allows temporary access. Create date and time-sensitive codes via the Codelocks Connect Portal or your own application with our simple API (application programming interface).

TYPES OF NETCODE®

Four types of NetCode® are available:

- Short term multi-use codes with durations from 1 to 12 hours and 1 to 7 days
- Short term single-use codes with durations from 1 to 12 hours and 1 to 7 days
- Medium term codes with durations from 1 to 21 days
- Long term codes that work for periods of up to 1 year

ADDITIONAL NETCODE® FEATURES

Block Previous NetCode®
This feature automatically blocks the last used NetCode® when a new NetCode® is entered.

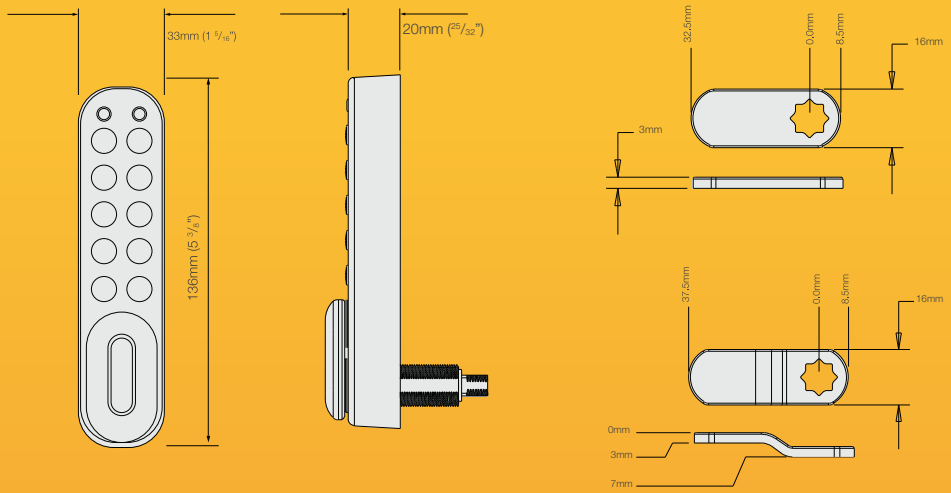

Block Specific NetCode®
Block a specific NetCode® directly on the lock using either the Master Code or another valid NetCode®.

Mode Restrictions
Choose which types of NetCode® to support. This is a useful feature if the number of potentially available NetCodes needs to be reduced.

Personal User Code
Allow a NetCode® user to create a personal 4 digit number that retains the same validity period as their originally allocated NetCode®.

Easy to install | On the door programming | Two year guarantee[2] | Private and Public Functions

PRODUCT DIMENSIONS

CODELOCKS CONNECT PORTAL

All NetCode® locks are registered via the web-based Codelocks Connect Portal.

Once registered, NetCodes can be generated and shared via email and SMS text message.[4]

Additional Portal Features
Language
Several languages available.

Associate Users
Add additional users to your account. These users can generate NetCodes for your locks.

Note: Not suitable for chlorine/coastal environments
