Chemistry inspired by the future

salveco

SALVESAFE MOUSS 100

USES

Prevents green deposit on roofs, terraces and hard surfaces. Intended for the maintenance of buildings and monuments, harbour areas, sports fields…

For roofs, facades, walkways, terraces, fences, ponds, pontoons, boat slips, athletic tracks…

Applicable to the following surfaces/materials: concrete, reed, stone*, brick, thatch, tarpaulin, tile, asphalt, blinds, paving, roofing*, greenhouse glass, paving stones, wood and metal siding*, painted surfaces.
Possible application method: low pressure sprayer or watering can according to the surface to be treated.

PROPERTIES

- Penetrates deeply and completely removes green deposits caused by algae and mould.
- Prepares surfaces before applying a protective product.
- Does not stain, does not deteriorate the supports and equipment such as gutters, windows…
- Renovating effect.
- Multi-support compatible (*do not apply to limestone, marble, aluminum or materials sensitive to acids).

SAFETY

- Do not apply in high heat or direct sunlight.
- Do not apply to surrounding vegetation.
- Not classified.
- Biocidal product. Use biocides with caution (TP2). Read label instructions before use.
- Dispose of package and contents in accordance with local regulations.
- No transport classification.

CHARACTERISTICS

Physical state: liquid.
Colour: colorless.
pH: 3 +/- 1
Density: 1.01 +/- 0.02

PACKAGING

– 5 L – 20 L – 210 L – 1000 L.
Other packaging on request.

BENEFITS

- 100 % active ingredient of plant origin.
- Formula made from ingredients of plant-based and mineral origin.
- Formulated without petroleum additives.
- Biodegradability of the formula according to OECD 301 guidelines.
- Made in France.
- Not classified for human health and the environment**.

DIRECTIONS FOR USE

- Ready-to-use product.
- Carry out a preliminary test.
- Use in dry weather.
- Do not treat in rainy weather, on frozen surfaces or in case rain is expected within 48 hours.
- Apply the product by wetting all surface (1L of product per 10m²).
- Leave the product to work until completely dry.
- Do not rinse.
- If necessary, brush off any residue after 48 hours.
- Apply once and then monitor the situation regularly.
- Repeat application if necessary.

INGREDIENTS

Active substance: lactic acid (CAS n° 50-21-5) 1,69 %.

** According to CLP Regulation (EC) No 1272/2008

PT2 - BtoB

EFFICACITY

- **Surface appearance before and after treatment in real outdoor conditions.**
