DATASHEET.

Product name
SM-S1-PLUS-1400-T
Item number
9300170
Manufacturer
SOLAMAGIC

Product description

SOLAMAGIC S1+ 1400W Premium infrared heater Titanium

The new premium infrared heater SOLAMAGIC S1+ is impressive not only with its improved, glare-free Solastar-HP heating tube, but also with its simple and quick mounting system and the integrated switch-on current limitation (for 2000 W devices). The casing is made of high-quality aluminum and is impressive with its noble design. The newly developed Solastar-HP heating tube also combines a more pleasant light color with perfect thermal behavior with minimal residual light and an average service life of 5,000 h. Especially in outdoor areas, infrared radiant heaters allow very flexible applications and create constant, pleasant heat zones on balconies, terraces or even in outdoor catering areas. Due to a short wavelength, infrared heat penetrates air particularly efficiently, is not exposed to wind drifts and guarantees high operating cost savings compared to gas radiators. Colors: white, titanium, nano-anthracite, special colors on request, practical mounting accessories, high efficiency, no heating phase, can be dimmed via optional wireless or Bluetooth dimming module, power: 1400/2000 W, without on/off switch, protection class: IP 44, protection class: I, dimensions: 520x200x92 mm, test mark: TÜV Nord, CE conform, weight: 3.0/3.2 kg, connection cable 50 cm with Schuko plug and Hirschmann coupling (loose enclosed), voltage: 230 V.

Technische Details

Model	Ceiling-/wall emitter	**Voltage**	230|230 Volt
Power step OFF	No	**Number of heating levels**	1
Mounting over cradle	No	**Min. heating power**	1400 Watt
Degree of protection (IP)	IP44	**Max. heating power**	1400 Watt
		Height	92 Millimetre
		Width	520 Millimetre
		Depth	200 Millimetre
