ANTERO

The harmonious tension between geometrical outer and organic inner contours creates an emblematic product image. In contrast to conventional urinals, the ceramic body of antero is shaped neither like a cone nor a cylinder. Instead the bowl rises organically towards the user out of a 380 x 765 mm rectangular ceramic surface. The flat rear wall fits standard connections and neatly conceals traces of previous installations during modernisation. The sloped ceramic surface and deep bowl tapered at the front guarantee
