

PRODUCT DATASHEET

Type: RLH-20-10
Art. Nr.: 36118

Short description

Heating loop for screed installation, 20W/m, 10m, 212W, 230V

Product Description

The RLH heating loops are ideal for laying in concrete and flowing screeds in interior areas for temperature control of floors. The laying distance allows application-oriented laying for each room. The factory-made heating loops with 15 or 20 W/m consist of a dipole heating conductor and a non-heating connection cable (cold end) with a length of 3 m, which is permanently waterproof. For an additional charge, the connecting cable can be produced in the desired length. Temperature resistant up to 90 °C, system design: CE marking, protection rating: IP X7, protective measure: RCD circuit 30 mA, heating conductor design according to VDE NH2G2GQUY, min. bending radius: 5 d.

ETIM characteristics

Cable type	Dual core	Nominal voltage	230 Volt
Screening	Braiding	Max. hold temperature	90 Degrees celsius
Colour	Black	Heating capacity	20 Watt per metre
Application	Other	Diameter	6 Millimetre
		Height	0 Millimetre
		Width	0 Millimetre
		Length	10 Metre
