**Manufacturer**

ETHERMA

**Product description**

Satellite dish heater 100W, for dish 85-95cm

SATHEAT is a specially developed heating element for keeping parabolic antennas free of snow and ice for private and public use. The heater is available in 4 standard sizes and has a built-in mechanical thermostat that turns on below °C and does not turn off until the surface temperature reaches °C. The heating element is 100% UV resistant. An additional heating cable guarantees a snow-free antenna. The fastening is done on site, either mechanically or with adhesive. Custom sizes are also available upon request. Colour: grey, CE marking, connecting cable: 3 m, 2x1 mm<sup>2</sup> protective braid, UV resistant.
