

PRODUCT DATASHEET

Type: eTRACE-30CHT
Art. Nr.: 40909

Short description

Constant heating tape for roof and box gutters, 30W/m

Product Description

The constant heating tape eTRACE-30CHT is ideal for gutter heating box gutters. The heating tape is a soft elastic made of insulated flexible tape and has a silicone layer. Design according to VDE regulation with soldered resistor wire. It lays flat in the gutter and reliably prevents tunneling snow. In order to achieve the lowest possible operating costs for gutter heating, it is necessary that the heating tape has optimum contact with the gutter. Constant heating tapes must not be installed in plastic gutters and drains. Nominal temperature: +200 °C, min. installation temperature: -60 °C, bending radius: 25 mm, CE marking, can be cut to length every 60 cm, max. heating circuit length at 16 A is 58 m.

ETIM characteristics

Screening	Braiding	Nominal voltage	230 Volt
Colour	Black	Max. hold temperature	200 Degrees celsius
Application	Gutter	Heating capacity	30 Watt per metre
		Diameter	0 Millimetre
		Height	8 Millimetre
		Width	11 Millimetre
		Length	1 Metre
