

PRODUCT DATASHEET

Type: Thermokit-GPTD
Art. Nr.: 38893

Short description

Plug cord with double thermostat, 3m, gutter heating

Product Description

The thermokit for gutter heating is a plug connection line in which a double thermostat is incorporated. A heating tape or a heating cable can be connected to this as desired. The thermostat is 100% moisture-proof and is switched on in the range between -5 °C and +3°C. Below -5 °C and above +3 °C it is switched off again. The plug connection cable is 3 m long and UV-resistant. After the thermostat a 50 cm long PTC thermistor is attached, to which one connects the heating tape or the heating cable. Including shrink sleeve set for the connection and termination of heating tapes and heating cables.

ETIM characteristics

Model	Heating cable/connection cable
Connection type	Heat shrinking technique
Scope of delivery	Equipped with closing
