

PRODUCT DATASHEET

Type: ICEL-1.5
Art. Nr.: 36043

Short description

Heating loop with thermostat for metal pipes, 1.5m, 5W, 24V

Product Description

The ICESTOP LIGHT protects pipes from ice and subsequently from damage. The ICEL is a ready-to-connect heating cable with a thermostat and a constant power of approx. 17 W/m with a voltage of 24 V. The cast thermostat is 100% moisture-proof and can switch on to frost protection in case of dangerous temperatures below 3 °C and off again from 9 °C. Only suitable for metal pipes. Protection rating: IP X7, CE marking, min. mounting temperature: - 15 °C, min. bending radius: 5 d, diameter: 7 mm, connecting cable: 2x1.0 mm².

ETIM characteristics

Cable type	Dual core	Nominal voltage	24 Volt
Colour	Black	Max. hold temperature	105 Degrees celsius
Application	Pipe heating	Heating capacity	15 Watt per metre
		Diameter	7 Millimetre
		Height	0 Millimetre
		Width	0 Millimetre
		Length	1.5 Metre
