Product Description

LAVA FRAME is the built-in infrared heating panel by ETHERMA, which can be installed in the ceiling and wall thanks to the installation frame included with delivery, creating a harmonious aesthetic in the room. LAVA FRAME is ideal in both drywall and concrete. Due to a special magnetic-field-free heating element, the device generates infrared radiant heat and, unlike conventional heaters, heats not only the air, but all objects and items in the room. In addition to operating as a full heating system, it is also suitable for heating zones. This not only saves heating costs, but also creates a pleasant, healthy indoor atmosphere. In addition to a large infrared radiation surface, the LAVA FRAME is remarkable with a timeless, contemporary design and fine structure. Colour: white RAL 9016, protection rating: IP 21, surface temperature: max. 120 °C, CE marking, mounting wall: horizontal and vertical, as well as in the ceiling possible, connection cable: 1 m, 3 x 1.5 mm², 230 V, TÜV, CE marking.

ETIM characteristics

Type of IR radiation	IR-C	**Power consumption**	700 Watt
Mounting method	Built-in	**Supply voltage**	230|230 Volt
Mounting direction	Horizontal/vertical	**Frequency supply voltage**	50|50 Hertz
Degree of protection (IP)	IP21	**Max. surface temperature**	120 Degrees celsius
Colour	White	**Height**	900 Millimetre
With imprint	✖	**Width**	900 Millimetre
With room temperature controller	✖	**Depth**	75 Millimetre
With mounting material	✔	**RAL-number**	9016
With framework	✔		
Material framework	Other		
Colour framework	White		
Surface treatment	Lacquered		
Surface structure front-side panel	Smooth		
With lighting cove	✖		
Dimmable	✖		
Light outlet	Direct
