DESCRIPTION

The new basalt technology allows extreme bending radii, however, the rods retain high dimensional stability. All connections have a RUNPOTEC RTG Ø 6 mm thread, have no butt edges or thread transitions. Objects weighing up to 2.5 kg can be held with the magnet. In combination with the magnet, the ball chain enables targeted locating or guiding to wall openings. In addition, the Comfort package includes the special sliding hook and can easily overcome obstacles up to 8 cm high thanks to the tilt function. The shockproof LED lamp also included has a very high luminosity and extremely long illumination time due to its AAA Duracell battery. All accessories can be perfectly stored in the practical storage bag with carrying strap.

Optimal area of application: suspended ceilings, cable ducts, hollow walls, retroactive cabling for non-routed cables, underfloor shafts, various bushings and much more.
