

THE ORIGINAL TYRE SEALANT

Seals up to 7mm holes in tubeless tyre tread. Will not seal sidewall holes or badly damaged tyres.

For temporary repair and vehicle recovery only. Do not exceed 80km/h (50mph) and replace the tyre or have it repaired as soon as possible.

May also be used for motorcycle or cycle tyre repairs: you will need a car power outlet for the compressor.

Order another bottle of OKO Get-u-Home to complete your emergency kit.

WARRANTY:

The OKO Group warrants OKO to be free from manufacturing defects. The OKO Group shall not be liable for any consequential or other damage or remedy.

The sole obligation of the OKO Group and your exclusive remedy is limited to product replacement.

SAFETY:

OKO is classified Non-Hazardous, but take common sense precautions:

Avoid contact with the eyes. Do not drink (harmful if swallowed). Keep out of the reach of children.

Manufactured under licence in the UK by the OKO Group.

REPAIRS STANDARD TYRES FOR
CARS, CARAVANS AND TRAILERS

HOW TO APPLY TO A CAR, CARAVAN OR TRAILER FLAT TYRE:

- 1** Drive the vehicle slowly until the valve is at approximately the 4 or 8 o'clock position.
- 2** Pull up the filling tube from the cap. Extract the Valve Core Remover: use it to carefully unscrew and remove the valve core from the valve stem.
- 3** Fit the end of the filling tube over the valve stem. Hold it tightly there.
- 4** Squeeze the bottle slowly so that OKO flows smoothly into the tyre. Use the whole bottle.
- 5** Screw the valve core back into the valve stem.
- 6** Using the OKO compressor, reinflate the tyre to the recommended pressure.
- 7** **DRIVE IMMEDIATELY** then as soon as it is safe to do so, stop and check the tyre pressure to ensure that it has sealed. If not, reinflate.

ORDER ANOTHER BOTTLE TO REPLACE THIS ONE WHEN USED, TO KEEP YOUR KIT COMPLETE
