

12Trace App

Once you've installed a 12Trace GPS Track and Trace system, you can find, track and monitor all your objects with this app. Everywhere you are, you can login and view your details. In addition, the app has several convenient options for turning on / off your starter interruptor and Geofence. Additionally provides the app with various information such as machine hours and Temperature.

The 12Trace app allows:

- View current locations
- Makes tracking your object very easy
- Check the machine hours
- Read external power
- Read temperature at smart
- Provide directions to your object
- Zoom in a few meters to the location of the object
- View the object in Street view

To remotely turn on and off different features like:

- Start interruptor
- Geofence
- Paging mode
