ELECTRONIC CARDS WITH 6 SAFETY OPTIONS

(Installed on Twin Cut range)

Part no	Item description	Modified on season	Main introduced modifications	Instructions to replace electronic cards
25722400/0	Electronic card with 6 safety options	1991/92	Electronic card for B&S 12.5 HP engines	
25722400/1	Electronic card with 6 safety options	1992/93	New electronic card with special terminal board to prevent wrong terminals connection	**It isn't interchangeable with previous one.** To install the electronic card /1 on old wiring harnesses /0 it's necessary to remove the two hooks of harness terminal board.
25722400/2	Electronic card with 6 safety options		Protects against crossed battery terminal, harness short circuit, voltage higher than 16,5 V. Equipped with a second fuse 0,5 A	Interchangeable with previous one
25722402/0	Electronic card with 6 safety options for Twin Cut	1993/94	Fuse 0,5 A has been substituted with a self resetting protection and audible warning indication that electronic card is operating.	To install the new items the female harness card board has to be substituted with car board part no **18540004/0** having 9 poles and vice versa
25722405/0	Electronic card with 6 safety option (with neutral switch)	1995/96	It replaces part no 25722402/0. New safety option is neutral-switch.	**To have new items interchangeables with previous one** substitute part **no 25722402/0** but no cable has to be connected to pole **9.** **To substitute part no 25720400/2**, that have been replaced with part no 25722402/0+ terminal board we will supply the new card + terminal board having 9 poles (part no cod. 18540004/0) but no cable has to be connected to pole **9**.
25722406/0	Electronic card with 6 safety options (with neutral switch and full grass-catchers)		It replaces part no 25722402/0. New safety options are neutral-switch and full grass-catcher	**To have new items interchangeables with previous one** substitute part **no 25722402/0** but no cable has to be connected to pole **9** and **22** **To substitute part no 25720400/2**, that have been replaced with part no 25722402/0+ terminal board we will supply the new card + terminal board having 9 poles (part no cod. 18540004/0) but no cable has to be connected to pole **9** and **22**.
25722408/0	Electronic card with 8 safety options (with neutral switch and full grass-catchers) for TCP 12,5/15,5 **John Deere**		For **John Deere** lawn tractors only. Special coating, and without fuse.	
25722412/0	Electronic card equipped with 6 leds safety option for neutral switch , full grass-catcher interface	1999/2000	It replaces part no : 25722406/0 – 25722408/0. Installed on lawn tractor having blade engagement by lever	On this new electronic card the led that on previous items was for lights now informs that **neutral** is engaged. **The new electronic card can not replace the previous one.**
25722413/0	Electronic card equipped with 6 leds safety option for neutral switch , full grass-catcher interface		It replaces part no: 25722406/0 – 25722408/0. Installed on lawn-tractors equipped with electromagnetic clutch	
25722414/0	Electronic card equipped with 8 leds safety option for neutral switch, full grass-catcher interface. Special coating for **John Deere machines**		It replaces previous part no 25722408/0
